HILL DIRECTORY CO.'S

(Incorporated)

Street and Household's Directory

AND LIST OF

Street Car Routes

OF

NORFOLK

1924

Copyright, 1924, by Hill Directory Company, Inc.

In the following list the streets are arranged in alphabetical order without regard to geographical situation, the intersecting streets being shown at exact intersection. The number of each building on the streets is given in numerical order, and opposite the number is placed name of the occupant householder. In the business blocks containing offices and stores the occupants of each place are shown. In some of the outlying districts the street numbers are incorrect, the houses not numbered, or are so scattered that it was not thought advisable to include the householders directory for such streets in this issue. The name of every inhabited street, however, is given with full description. The list includes all alleys, avenues, courts, places, circles, squares, terraces and sub-divisions, giving their location as near and concise as possible.

The profession, business, etc., of individuals and firms are only given at their respective places of business; to find the occupation of householders, refer to Alphabetical List of Names.

Every effort has been made to insure accuracy in this issue. If your house does not appear upon its proper street, or if the street upon which you reside does not appear, we will thank you to notify us so that correction will be assured in the next issue.

The publishers experienced serious difficulty this year in compiling this directory due to nearly 500 street names being changed after they had started their work. However, greater care than usual has been taken to avoid as much confusion as possible. By the time the next edition is compiled it is hoped these changes will have become definitely settled and understood, so a better compilation will result.

NOTE.—Dash (—) before name denotes that the house should have a number between the one preceding and the one following it. (* * *) between two intersecting streets show there are no houses between them.
